

## NZ FOREST ROAD ENGINEERING MANUAL & OPERATORS GUIDE

The NZ Forest Owners Association is strongly committed to assisting its members to achieve the highest standards of plantation forestry practice. This is reflected in the fully revised edition of the Road Engineering Manual first published in 1999 by the former Logging Industry Research Association (LIRA). This 2012 edition is the result of a major rewrite. It contains much needed erosion and sediment control guidance, introduces new materials and methods, and describes best practice construction techniques. The Road Engineering is intended to be used in conjunction with the companion publication, the Operators Guide. The manual is designed for the manager and planner, while the operators guide is designed to be used by the practitioner in the forest.

### Order Form

Item Description	Qty.	Price
NZ Forest Road Engineering Manual - 2012		\$115.00 per copy
